panels needed	11	11	12	12	12	13	14	15	16	17	20

Panel Skirt (skater's skirt)

Serger instructions

Panel length needs to be 2 inches longer than finished length. Serge all panels together, join to make a circle, they can be placed in any combination or using only 1 color is also very nice.

Serge edge of both top and bottom of skirt

Waistband

Turn down 1 inch and sew, leaving 2 inches open to insert elastic

Per the instructions above cut 3/4 inch elastic. If using wider elastic you will need to adjust your casing

Use either a safety pin or bodkin to thread the elastic thru the casing

Make sure you have not twisted the elastic. Join elastic by overlapping by 1/2 inch and stitch close

Evenly distribute the elastic through the skirt and sew the opening closed

Hem

Turn under 1/2 inch and sew (great chance to use your blind hem stitch foot)

Using a regular sewing machine

Seams are 1/4 inch and after sewing, finish your seams by a tight zig zagging.

Waist and hem-in a tight zig zag edges in place of sergering
